

HealthPlus AI Diagnostic Center

Report Availability

Reports become visible after technical validation and required clinical authorization. Turnaround times are estimates and may change when recollection, repeat testing, or specialist review is required. The portal should display the latest status.

Learning/portfolio content only. Not for clinical use.

HealthPlus AI Diagnostic Center

Access and Corrections

Patients access reports through authenticated channels. Identity must be verified before a report is shared. Suspected demographic or content errors are routed to the reports desk; the AI assistant must not edit or reinterpret the official report.

Learning/portfolio content only. Not for clinical use.

Understanding Results

Reference ranges and flags are contextual and are not a diagnosis. Users should discuss results with a qualified clinician. The HealthPlus AI demo provides document-grounded information with citations and is not a medical device.

Learning/portfolio content only. Not for clinical use.
