

HealthPlus AI Diagnostic Center

Patient Registration SOP

1. Verify the patient's full name, date of birth, mobile number, and photo ID.
2. Create or locate the HealthPlus patient identifier.
3. Confirm consent and communication preferences.
4. Record allergies only when supplied by the patient or clinician.
5. Route clinical questions to qualified medical staff.

Learning/portfolio content only. Not for clinical use.

HealthPlus AI Diagnostic Center

Diagnostic Appointment SOP

Confirm the ordered test, preparation instructions, appointment time, and location.

For fasting tests, repeat the approved preparation instructions from the Test Catalog.

Escalate order mismatches to the diagnostic desk; reception staff must not alter an order.

Learning/portfolio content only. Not for clinical use.

HealthPlus AI Diagnostic Center

Critical Result Communication SOP

Validated critical results follow the approved escalation matrix. The laboratory contacts the ordering clinician, records the communication time, and documents read-back confirmation. AI-generated output must never replace this workflow.

Learning/portfolio content only. Not for clinical use.
